

i-Scope USB

Essential Viewing for Skin Counselling Professionals

Seeing is Believing

Support your experienced observations by quickly assessing a customer's skin condition and use clear digital images on your computer to inform and advise.

Broaden the range of conditions you can advise on by using higher magnifications to show your customer views they rarely see.

Build customer confidence and loyalty by retaining images for future comparison.

Calm Functionality

Simple computer connection via USB and minimal two button control.

Unobtrusive technology that is light and easy to use doesn't distract from the ambience you want to create.

View & Inspect

- Texture
- Pigmentation
- Wrinkles
- Squames

Analyse, Recommend & Record

- Images
- Customer care history

All Seeing

i-Scope is complimented by a versatile range of lenses with magnifications to suit diverse skin and hair counselling requirements.

Request your free copy of Moritex's Skin Counselling Advice and Support Handbook and discover how much more you can see.

i-Scope USB

Technically Speaking

Using the latest plug and play technology i-Scope connects directly through a USB port to a PC allowing viewing and recording of a customers skin or hair condition.

Compact and weighing only 200g and based upon advanced CCD camera technology the i-Scope is the perfect tool to visually communicate the condition of a customers hair, scalp or skin.

With only two buttons controlling its operation, (freeze image and PL light), i-Scope is simple to use along with the supplied viewer software that allows viewing, storing and comparing of images.

Skin texture and pigmentation can now be seen more precisely because i-Scope uses three polarising filters to minimise light diffusion.

Built for versatility i-Scope has a comprehensive range of rapid interchange lenses with magnifications from X1 to X700.

Product Specification

Main body

Photoreceptor 1/3-inch CMOS sensor
 Significant number of pixel: 640 (H) x 480 (V)
 Light source White LED
 Dimmer PL on/off changing
 Bayonet lens mount
 Weight 160 g (excluding the cable)

Included Items

Software CD: Driver and Moritex Viewer
 Stand

Recommended PC (Not Supplied)

CPU Pentium III, 233 MHz or over
 CD-ROM
 RAM 64 MB min
 USB port equipped
 OS: Windows Me, Windows 2000, Windows XP

Lenses

Purchase separately from the i-Scope Lens range.

Features

Lenses for Every Counselling Need

- **X1** Views large areas such as the face, back, hands, etc.
- **X30PL** The most popular in skin-related applications. Direct and polarization available. Polarization reduces surface reflection of the skin making it easier to see deeper into the epidermis.
- **X50PL** This lens is popular in both skin and scalp applications. As with the X30 lens, both direct and polarized lighting is also available on this lens.
- **X120** Used mainly for hair and scalp analysis, the X120 lens provides an incredibly clear and crisp image.
- **X200** Popular for hair and scalp analysis, the X200 lens shows superb detail.
- **X700** Used almost exclusively on the hair, the X700 lens is so powerful, it can reveal the hair's cuticle.
- Also available: **X5, X10, X15**
