

The **ALL NEW** Hawkeye® V2 Video Borescope!

Excellent image quality, at half the cost of comparable videoscopes!

The all new Hawkeye® V2 Video Borescopes contain a brighter, higher resolution, more durable camera, delivering sharp, clear photos and videos in a wide range of demanding inspection applications. The new, larger 5" LCD screen provides detailed close-up views, has a 2X zoom function, mirror image capability, and easy-to-use intuitive controls. We've designed a new articulation mechanism, and increased the range to +/-150 deg. The insertion tube has rugged, 4-layer construction, with a crush resistant stainless steel inner layer, and an abrasion resistant Tungsten outer layer which is urethane impregnated for smoother insertions. New optional 90° DOV Prism Tip works seamlessly with the V2. Hawkeye V2 Video Borescopes are available in diameters of 4 and 6 mm, lengths of 1.5m, 3.0m, and 6.0m. Made in the USA.

Aircraft & Power Generation maintenance teams can quickly and easily inspect turbine blades, combustion chambers, cooling tubes, and much more, all without the need for costly and time consuming engine and system tear-down. Foundries can inspect for flash, sand, and voids inside complex castings.

Hawkeye V2 Video Borescopes deliver the same image quality, portability, and articulation of scopes costing three times as much.

Using the Close-Focus Tip, fine cracks are detected inside a combustion chamber.
